

Cameron Clark
Director

Short Biography

For more than fifteen years Cameron has delivered a range of health, safety, environmental and risk management solutions to organisations across almost every industry in Australia. Part of Cameron's success comes from his experience in consultancy, managerial and operational roles, providing him with a well rounded understanding of commercial, operational and legislative requirements that must be balanced to achieve long term sustainable risk management outcomes.

Cameron's experience includes significant tenures in Commonwealth, State and Local government, Transport, Logistics, Defence, Finance, Telecommunications, Property, Building and Construction, providing Cameron with a depth and breadth of experience rarely seen. During these tenures Cameron has identified a number of unique HSE risk management solutions and developed a strong network of trusted, technical professionals. Cameron regularly leverages these networks for the benefit of his clients, becoming a 'one stop shop' for solving HSE risks.

Cameron is also Verus' project delivery leader and specialises in delivering large and complex risk management programmes, including the development of strategic programmes, risk management frameworks and assessments, behavioural safety assessments, safety awareness training as well as management systems development and auditing. Cameron's experience extends beyond HSE risks, having developed and implemented organisational wide risk management frameworks, corporate governance programmes as well as Business Continuity and Crisis Management Plans.

He is a highly effective and proven change leadership and business coach, able to develop and influence stakeholders at all levels and stimulate sustainable safety culture transformation.
